

We're Expecting

LEVEL II RENOVATION SUMMARY

The St. Francis Level II Nursery accommodates our youngest patients when they arrive in the world needing a little extra support and care. The babies in our Level II are cared for by a team of providers that are staffed through our partnership with [Children's Minnesota](#).

29% of newborns born at St. Francis in 2022 needed to utilize the services in our Level II Nursery. Instead of needing to transfer these patients away, we were able to care for them close to home.

This renovation will:

- Create six private spaces, allowing two of them to expand and accommodate twins
- Provide an opportunity for us to add natural light features along with artwork that incorporates natural healing elements (wood, water, light, fire, metal)
- Allow private space for families to comfortably bond and care for their new baby/babies
