

Emergency Department Renovation and Expansion

Due to steady population growth, increasing wait times, and patient acuity, more space is needed to accommodate growing volumes.

Saints Foundation is raising \$6.2 million to align with the project and to fund a new garden space once the project is complete.

The renovation will:

- Remodel space and expand to add 7 more clinical rooms (34 total).
- Create a new, larger, drive through ambulance garage (4 rig).
- Relocate Emergency Department entrance to face North.
- Add a circular drop-off and canopy extending to the Cancer Center entrance.
- Add new isolation rooms, equipment storage, breakroom, and storage space.
- Add fast track treatment area for patients who can be seen and discharged quickly.
- Provide an exceptional healing experience for our patients.
